**[Limited]**

## ACTA NEGOTIATIONS

**Purpose:** For information

**Attached:** ACTA negotiating documents

Enclosed is a document summarising the Commission's analysis of the US proposal *Special Requirements Related to the Enforcement of Intellectual Property Rights in the Digital Environment*.

This document consolidates the views of the Commission services concerned with the comments received from MS (Sweden, Germany and Ireland). It will constitute the basis of the EU oral intervention regarding this agenda point, but since the EU will not submit counterproposals to the US text during this round, it will not be distributed to the other ACTA partners.

As agreed among ACTA participants, the negotiating papers are not public documents and therefore should be treated with reserve.
